

Applied Weather Modification: Interview Questions - Pilots

Introduction (by David Delene)

Today I have with me ???. I know ?? because

Interview Questions

1. Can you tell me how you became interested in being a pilot?
2. What was your first experience as a pilot on a weather modification project?
3. What do you remember most about your first weather modification project?
4. What is the most important thing to know about working on a weather modification project?
5. What surprised you the most about being a pilot on a weather modification projects?
6. In the applied weather modification class, I discuss how weather modification operations are not just following a step-by-step guild, but requires critical thinking where knowledge from many fields has to be synthesized for making decisions. Can you give an example of where you had to draw on your knowledge and experience when making an operational weather modification decision?
7. What have you done in your career since your first weather modification project?
8. What advise would you give to people interested in working on a weather modification project?
9. Is there anything else you would like to add?
